# GIMBORN

THE CAT CARE COMPANY

This vision drives us to develop products that meet the needs of pets and their owners.

Our company slogan “Gimborn – The Cat Care Company” emphasizes the quality-oriented philosophy of our premium products and brands.

## “OUR MOTIVATION IS TO CREATE MAGICAL MOMENTS BETWEEN HUMANS AND PETS.”

### GERMAN ROOTS—GLOBAL HART

**Gimborn – The Cat Care Company** Founded 1855 as a pharmaceutical company, we have become in over 50 years a successful pet specialist. We develop, produce and market premium Cat and Dog Snacks under the **GimCat** and **GimDog** brands. Since 31 years we produce premium Cat Litter under the **Biokat's** brand.

### TRULY GLOBAL. TRULY DIVERSE.

Being a truly international company, we successfully sell our products in over 50 countries. Our core markets are Germany, the Netherlands, Italy and China. We take up leading positions with our added value brand concepts within the Specialized Pet Trade, Online, Grocery and the Vet Channel.

### INNOVATION

We are characterized by a profound understanding of the needs of pets and their owners.

Gimborn has his own R&D department in Emmerich for **GimCat** & **GimDog** treats and in Kelheim for our **Biokat's** Cat Litter. This puts us in a position to successfully develop and implement new innovations.

The knowledge is also acquired in cooperation with R&D departments of several veterinarian universities and specialists.

Gimborn is the first manufacturer of Taurine in Cat snacks.

We are also the pioneer in adding essential vitamins and minerals to the cat's snack. Multiple international awards are proof of this.

### GIMBORN QUALITY PROMISE

Our Emmerich and Kelheim plants are both DIN ISO 9001 certified. We guarantee our quality through constant monitoring and supervision of our entire production process.

Our recipes have been developed according to the latest scientific knowledge. All Gimborn snacks have been developed and are produced based on ingredients that are suitable for humans.

Gimborn—over 160 years of German tradition and quality, we use for our untiring striving for innovation.

# Biokat's®

*Responsibility  
for tomorrow's  
environment*

CO<sub>2</sub> friendly  
production process

Renaturation  
of the mines

Short  
transport routes

Cat litter made  
from natural clay

New: Packaging made from  
FSC®-certified paper

Made in  
Germany

Pure well-being  
[www.biokats.info](http://www.biokats.info)

Biokat's is the cat litter brand, which stands for 100% natural cat hygiene and pure well-being.

Sustainability is at the heart of our positioning. Like no other cat litter brand, Biokat combines superior odour control with environmental friendliness.

Developed by our **cat hygiene experts**.

## THE UNIQUE SUSTAINABILITY CONCEPT OF BIOKAT'S

- Biokat's cat litter is produced in Germany. This means short transport routes and low CO<sub>2</sub> emissions on the way from quarry to production.
- Almost exclusively German raw clay of high quality is used. This guarantees the German quality products of Biokat's and also secures employment in Germany.
- The quarries that Biokat's opens to extract clay are cultivated again after full extraction and returned to nature. This means creating new valuable ecological habitats. Throughout the extraction process, the quarries are constantly monitored by geologists and kept in their natural equilibrium.
- Through continuous technical innovations in the production of our Biokat's, we have been able to halve our energy consumption since 1991.
- At our cat litter production site in Kelheim (Bavaria), our own combined heat and power plant is operated with natural gas and produces heat and electricity at the same time. We use the heat generated by the natural gas during the production of electricity to dry the gravel. The electricity we produce meets 70% of our needs. In some cases, the amount of electricity produced is so high that we can return the surplus electricity to the network.
- We are also gradually expanding our fleet with electric forklifts.
- We are continuously converting the entire company to LED light sources
- In 2011, the Carbon Footprint Company calculated the CO<sub>2</sub> energy value of the production of the Biokat's in Kelheim. It confirmed this example. That's why we received the ECO CARE AWARD in 2012 for our sustainability concept at Biokat's.
- In 2017, Reclay GmbH calculated the CO<sub>2</sub> energy value of the production of Biokat's in Kelheim and confirmed this once again as an example. Some of the results improved compared to 2011, when emissions from, for example, Classic 3in1 and Classic fresh 3in1 decreased by a further 11 percent.

**German Awards  
for Excellence 2018**

Gimborn GmbH

### HIGHLY EFFECTIVE ACTIVATED CARBON

- Our pure natural activated carbon is made from coconut shells, a **sustainable raw material**.
- Activated carbon is a very porous form of carbon with an **enormous internal surface area**.
- If you were to fold out only 2 grams of activated carbon, that little bit of carbon would have a total surface area of no less than half a football pitch (2000 m<sup>2</sup>)!
- Due to its **special physical properties, fragrances** are **extremely effectively bound** to the activated carbon. This simple principle is known as the “vanderwaal forces”.
- Due to the enormous surface area of the activated carbon and the vanderwaal forces, the activated carbon can bind an incredible number of odours extremely effectively.
- In households activated carbon has been used for a long time, e.g. in extractor hoods, in odour filters of refrigerators, in water filters and in shoe soles.
- **Activated carbon—our “black diamond”!**

### ALOE VERA FOR GENTLE CARE

- **Aloe vera** comes exclusively from leaves of the ‘**Aloe barbadensis Miller**’.
- Immediately after harvesting, the ripe leaves of the aloe vera are transported from the plantations to the factory, so that their valuable components are fully preserved. At the factory, the leaves are washed with water and then peeled by hand. The leaf fillets are then processed into gel, concentrated liquid or powder.
- Aloe vera is used as a liquid and sprayed over the cat’s grit. This way, all granules get a **“caring shower”**.
- Test it yourself: Rub a few granules between your fingers. Do you feel how soft your skin feels after that?
- A wonderful feeling that lasts for a long time! Your cat will love this feeling, because cats are very clean animals.
- We use aloe vera **in a quantity that is well tolerated** by cats.
- **Aloe vera—our “green diamond”!**

### AROMAPROTECT FORMULA™

- If we perceive a bad odor, it is composed of hundreds of different odor molecules
- The mixture of the different molecules leads to an unpleasant odour.
- **AromaProtect is a technology that optimally reduces bad odors**
- Because every bad smell is individual, the **AromaProtect formula** is adjusted to a certain unpleasant smell—in this case cat urine
- Small fragrance molecules captures the bad smells and thereby change the perception of what the nose smells in the brain.
- **The supposed bad smell is replaced by a pleasant fresh smell**

DIAMOND FORMULA™

- **Diamond Formula™** additionally offers highly effective protection against unpleasant odours by natural **activated carbon** and extra care by **aloe vera**.
- **Active carbon** for highly effective odour binding and absorption
- **Aloe vera** for cat-friendly, natural and gentle care

FRESHLOCK FORMULA™

- **FreshLock Formula™**= natural activated carbon + **AromaProtect Formula™**, for maximum odour and at the same time a hygienic and freshly smelling litter tray
- **Active carbon** for highly effective odour and absorption
- **AromaProtect Formula™** for maximum fragrance and fresh cotton blossom fragrance

HYGIENE FORMULA™

**Three different granule sizes:**

- Large granules for **extra fast odour absorption**
- Medium-sized granules for the formation of **extra solid clumps**
- Small granules for **extra long use**

**Biokat's**<sup>®</sup>

*Our favourite  
cat litter* 

A cat litter we both feel comfortable with.

Pure well-being

- Inspired by the nutrient profile of natural prey
- With 70% meat & high-quality offal
- Especially rich in protein & nutrients
- No added sugar, grain-free recipe
- No artificial colors, attractants, or preservatives

<b>85 G</b>	430 775	languages
Unit 6 pcs		DE,EN,ES,FR,IT,NL,TR
	4 002064 430775	

### NEAR NATURE MIX 12 X 85 G

- Inspired by the nutrient profile of natural prey
- With 70% meat & high-quality offal
- Especially rich in protein & nutrients
- No added sugar, grain-free recipe
- No artificial colors, attractants, or preservatives

<b>85 G</b>	430 782	languages
Unit 12 pcs		DE,EN,ES,FR,IT,NL,TR
	4 002064 430782	

### KITTEN MILK

- Suitable as a complete meal or as a supplementary feed
- With DHA, colostrum, and GOS prebiotics
- Enriched with vitamins and L-arginine
- Free from preservatives, colorings, and artificial flavorings

<b>200 G</b>	426 242	languages
Unit 6 pcs		DE, EN, ES
<b>2 KG</b>	426 266	languages
Unit 1 pcs		CZ,DE,EN,ES,FR,IT,NL,PL

### KITTEN GOAT MILK

- Inspired by natural mother's milk
- With DHA and FOS prebiotics
- Enriched with vitamins and L-arginine
- Free from preservatives, colorings, and artificial flavorings

<b>200 g</b>	426259	languages
Unit 6 pcs		DE, EN, ES

Gim  Dog®

### PURE DELIGHT CHICKEN

- Tender pieces of meat with proteins in jelly
- Ideal for sensitive dogs with special requirements
- Without wheat, gluten and soya

<b>85 G</b>	513 003	languages
Unit 12 pcs	 4 002064 513003	DE, EN, NL
<b>150 G</b>	513 072	languages
Unit 18 pcs	 4 002064 513072	DE, EN, NL

### PURE DELIGHT CHICKEN & LAMB

- Tender pieces of meat with proteins in jelly
- Ideal for sensitive dogs with special requirements
- Without wheat, gluten and soya

<b>85 G</b>	513 041	languages
Unit 12 pcs	 4 002064 513041	DE, EN, NL
<b>150 G</b>	513 065	languages
Unit 18 pcs	 4 002064 513065	DE, EN, NL

### PURE DELIGHT CHICKEN & BEEF

- Tender pieces of meat with proteins in jelly
- Ideal for sensitive dogs with special requirements
- Without wheat, gluten and soya

<b>85 G</b>	513 034	languages
Unit 12 pcs		DE, EN, NL

### PURE DELIGHT CHICKEN & TUNA

- Pieces of fish and meat with proteins in jelly
- Ideal for sensitive dogs with special requirements
- Without wheat, gluten and soya

<b>85 G</b>	513 027	languages
Unit 12 pcs		DE, EN, NL

### PURE DELIGHT TUNA

- Tender pieces of fish with proteins in jelly
- Ideal for sensitive dogs with special requirements
- Without wheat, gluten and soya

<b>85 G</b>	513 010	languages
Unit 12 pcs		DE, EN, NL

### PURE DELIGHT TUNA & BEEF

- Pieces of fish and meat with proteins in jelly
- Ideal for sensitive dogs with special requirements
- Without wheat, gluten and soya

<b>85 G</b>	513 058	languages
Unit 12 pcs		DE, EN, NL

## LINSEED OIL

Source of alpha-linolenic acid. Contains omega-3 and -6 fatty acids, which provide effective cell protection and support mobility.

## L-TRYPTOPHAN

Essential amino acid, for the synthesis of proteins. It is essential in humans, meaning the body cannot synthesize it; it must be obtained from the diet. Tryptophan is also a precursor to the neurotransmitter serotonin (the so-called “good-humor hormone”) and the hormone melatonin (responsible for the quality of sleep).

## MALT

Malt is the caryopsis (grain) of a cereal that has undergone germination, so it has sprouted. In cats it promotes the natural elimination of hairballs in the stomach and provides an additional energetic contribution. Cats spend most of the day taking care of the hair and licking: they swallow many dead hairs, which, once in the stomach, can generate balls of fur. This is especially dangerous for longhair cats and older cats.

## PHOSPHOR

Like calcium, phosphorus also plays an important role in bone metabolism and tooth structure. Furthermore, it is involved in almost all metabolic functions and serves as an energy source for all cellular processes. In pet feeding, it is important to evaluate the correct Ca/P ratio, e.g. for proper growth and development of bones and teeth in young subjects.

## PSYLLIUM

Psyllium husk used as a dietary fiber both for the relief in case of diarrhea, absorbing the excessive liquids as well as a natural and soft remedy for constipation. Its seeds in contact with water swell and increase in volume up to 30 times to their dry form, thus producing a gel capable of increasing the amount of fecal mass, softening its content. They are therefore useful for strengthening the immune system, and improving intestinal efficiency.

## ST. JOHN'S WORT

Flowering plant in the family hypericaceae. Mild anti-depressant, positive impact in case of restlessness and nervousness and promotes building of serotonin.

## TAURINE

Essential sulfonic amino acid, it is essential for cardiovascular function, and development and function of skeletal muscle, the retina, and the central nervous system. In the cat, which is not able to synthesize it in its own organism, and must therefore assume it from the outside, it is indispensable for its survival; its deficiency can lead to serious problems, such as retinal degeneration; the myocardium (heart) may also be affected.

## GOS

Galactooligosaccharide from lactose derivative.

## YEAST

Yeasts are eukaryotic, single-celled microorganisms. More than thousand species of yeasts have been cataloged. Some species are commonly used for leavening bread and fermenting alcoholic beverages (beer): the most commonly used is a saccharomyces (*Saccharomyces cerevisiae*). The brewer's yeast contains B vitamins (in particular B8 = Biotina), and is rich in trace elements including e.g. calcium, phosphorus, zinc and selenium.

## ACIDO FOLICO

Vitamin B9, water-soluble and essential for the synthesis of DNA and proteins, important for the growth. Necessary support for the synthesis of haemoglobin and the formation of red corpuscles.

## BETA-GLUCAN

Supports the immune system, helping the formation of antibodies; it activates the macrophages, that neutralize external agents (bacteria, etc.) to the organism, phagocytizing and neutralizing them; this helps reduce infections.

## BIOTINA

Biotina is a water-soluble B-vitamin. Biotina is an important component of enzymes involved in metabolizing fats and carbohydrates, influencing cell growth, and affecting amino acids involved in protein synthesis. Biotina assists in various metabolic reactions involving the transfer of carbon dioxide. It may also be helpful in maintaining a steady blood sugar level.

## CALCIUM

Skeleton component; it is necessary for the organism to perform numerous and fundamental functions. It intervenes in bone formation and resorption, in blood coagulation, in nerve conduction, in neuromuscular transmission, in muscle contraction, and in cell growth and division.

## CELLULOSE

Cellulose determines a “dead weight” effect, useful in case of elimination of toxic substances or of constituents that are difficult to degrade.

## DRIED GRASS

Fibre for a controlled digestion, as a source of amino acids, vitamins and trace elements.

## EGG YOLK

Covers the need of arachidonic acid (omega-3 fatty acid), particularly important in cats for their regular growth. It's an excellent source of “noble” proteins, with high nutritional and biological value, as they are rich in essential amino acids. Those cats cannot “produce” on their own, synthesizing them in their own bodies, but must take them on via food: arginine, histidine, isoleucine, leucine, lysine, methionine, phenylalanine, threonine, tryptophan, valine.

## ELM BARK

Coming from the slippery elm, native in Eastern North America, well known for its properties already by the Native Americans. The elm bark is also called herbal mucilage and has a protective effect on the mucous membrane. The mucilages adheres on the intestine wall, covering them with a film that protects and regenerates them; for this reason, elm is considered one of the most effective natural remedies for treating problems of the gastrointestinal tract.

## ESCHOLZIA HERBS

Flowering plant in the papaveraceae family native to the United States. Natural remedy and pain reliever. Helps against sleeplessness and nervous unquietness. Its use is therefore indicated in case of anxiety, stress, sleep disorders (insomnia, nocturnal awakenings), psychosomatic disorders, irritability, pains of a psychic nature, nervousness.

## FISH OIL

Source of docosahexaenoic acid (DHA) and eicosapentaenoic acid (EPA) obtained by the synthesis of alpha-linolenic acid. Has an anti-inflammatory effect. It is mainly found in salmon, tuna, anchovies, sardines and herring, therefore in fish with fatty meats.

## GLUCOSAMINE

Is an amino sugar and a prominent precursor in the biochemical synthesis of glycosylated proteins and lipids. Glucosamine is part of the structure of the polysaccharides chitosan and chitin, which compose the exoskeletons of crustaceans and other arthropods. Positive support for cartilage and joint flexibility.

## L-CARNITINA

Essential amino acid, important for the transport of fats inside the cells, demolishing and producing energy. Important for the function of the muscle-skeletal and cardio vascular systems.

### INFORMATION ABOUT VITAMINS

---

Vitamins regulate many important functions of the cat's body.

Most vitamins cannot be produced in the body and therefore need to be ingested through food.

#### **VITAMIN B1 (THIAMINE)**

Metabolism, supports nerve function. Deficiency can cause fatigue, performance decreases.

#### **VITAMIN B2 (RIBOFLAVIN)**

Metabolism, important for eyes. Deficiency can create increased risk of cataracts.

#### **VITAMIN B6 (PYRIDOXINE)**

Metabolism, formation of messenger substances in the nerves, hormone formation, immune system.

#### **VITAMIN B12 (COBALAMIN)**

Blood formation, cell division, metabolism. Deficiency can cause neurological symptoms.

#### **VITAMIN C**

Performs multiple functions: contributes, for example, to wound healing, is antioxidant in the body, that is, captures free radicals. It improves the immune system in general and supports an increase in the activity of immune cells.

#### **VITAMIN D3 (CHOLECALCIFEROL)**

It is necessary for bone formation and calcium/phosphorus absorption and is especially important for growing cats and for nursing cats. In the case of vitamin D deficiency, calcium absorption capacity is reduced.

#### **VITAMIN E**

It is an antioxidant substance, active against free radicals and which helps the production of energy. It is important for reproduction. A deficiency can lead to disorders of the central nervous system and retinopathy. In puppies and in pregnancy and lactation the need is greater.

#### **VITAMIN K (MENADIONE)**

Responsible for blood coagulation. A deficiency of this vitamin determines a reduced blood coagulation capacity. In the event of injury, this can lead to a slowing down of the wound healing process.
